

Swapify - User Stories

Project Overview

Project Name: Swapify (BarterLink)

Project Type: Smart Barter Exchange Platform

Platform: Web-based Application

Team:

Soha Talaat, Sarah Mahmoud, Abdelrahman Ramadan, Abanoub Yousry

User Personas

1. Eco-Conscious Consumer

- Age: 28-35
- Motivated by sustainability and reducing waste
- Actively seeks alternatives to traditional shopping
- Values community and peer-to-peer interactions
- Tech-savvy and comfortable with online platforms

2. Budget-Savvy Shopper

- Age: 22-40
- Cost-conscious and seeks economic alternatives
- Wants to maximize value from unused possessions
- Pragmatic approach to consumption
- Seeks transparent and fair exchange processes

3. Niche Item Collector

- Age: 30-50
- Seeks rare or hard-to-find items
- Values unique and distinctive products
- Willing to trade specialized items or services
- Appreciates community of like-minded collectors

4. Service Provider

- Age: 25-45
- Offers professional services (design, writing, consulting)
- Seeking goods or other services in exchange
- Values efficient communication and clear terms
- Needs reliable and trustworthy platform

5. Platform Administrator (Admin)

- Manages platform operations
- Monitors user behavior and content
- Handles disputes and violations
- Maintains system integrity and security

Epic 1: User Account Management

US-1.1: User Registration via Email

As a new user

I want to create an account using my email address

So that I can access the Swapify platform and start listing items

Acceptance Criteria:

- User can enter email and password.
- System validates email format
- Password meets security requirements (minimum 8 characters, mixed case, numbers)
- Confirmation email is sent to user
- User must verify email before account activation
- Clear error messages for invalid inputs
- User can proceed to profile setup after registration

US-1.2: User Registration via Google OAuth

As a user

I want to register using my Google account

So that I can quickly create an account without remembering another password

Acceptance Criteria:

- Google OAuth integration is functional
 - User can click "Sign up with Google" button
 - User is redirected to Google login
 - User permissions are requested (email, profile)
 - Account is created automatically upon successful authentication
 - User profile is pre-populated with Google data (name, profile picture)
 - User can proceed to profile setup immediately after
-

US-1.3: User Profile Creation

As a registered user

I want to create and customize my profile

So that other users can learn about me and trust my listings

Acceptance Criteria:

- User can upload a profile picture
 - User can enter bio/description (up to 500 characters)
 - User can select location/city
 - User can specify categories of interest
 - User can set communication preferences
 - Profile information is saved and retrievable
 - User can edit profile information at any time
-

US-1.4: User Login

As a registered user

I want to log in to my account

So that I can access my profile and manage my listings

Acceptance Criteria:

- User can enter email/username and password
 - System validates credentials
 - User is logged in upon successful authentication
 - Session is created and maintained
 - User can log out at any time
 - "Remember me" option is available
 - Clear error messages for invalid credentials
-

US-1.5: Password Reset

As a user

I want to reset my password if I forget it

So that I can regain access to my account

Acceptance Criteria:

- User can click "Forgot Password" link
 - User enters email address
 - Reset link is sent to email
 - Reset link expires after 24 hours
 - User can set new password via reset link
 - New password must meet security requirements
 - User receives confirmation email
-

Epic 2: Item/Offer Management

US-2.1: Create Product Listing

As a user

I want to create a listing for a product I want to exchange

So that other users can see what I'm offering

Acceptance Criteria:

- User can enter product name and description
 - User can upload multiple product images (up to 5)
 - User can select product category (electronics, furniture, clothing, etc.)
 - User can specify product condition (New, Used, Like New)
 - User can describe desired item/service in return
 - User can set listing as active or draft
 - Listing is saved and appears on user's profile
 - User receives confirmation of listing creation
-

US-2.2: Create Service Listing

As a service provider

I want to list a service I can offer

So that users seeking that service can find me

Acceptance Criteria:

- User can enter service name and detailed description
 - User can upload service-related images/portfolio samples (up to 5)
 - User can select service category (design, writing, consulting, etc.)
 - User can specify service availability/timeline
 - User can describe what they seek in return
 - Listing includes service details and user expertise
 - User can edit service details anytime
-

US-2.3: Edit Listing

As a listing owner

I want to edit my product or service listing

So that I can update information or correct mistakes

Acceptance Criteria:

- User can access their listings from profile
 - User can edit all listing fields (name, description, images, category, etc.)
 - User can add or remove images
 - User can change desired item/service
 - Changes are saved immediately
 - User can deactivate listing without deleting it
-

US-2.4: Delete Listing

As a listing owner

I want to delete a listing I no longer want to offer

So that it no longer appears on the platform

Acceptance Criteria:

- User can delete their own listings
 - Confirmation dialog appears before deletion
 - Listing is removed from user profile
 - Deleted listing data is archived (not permanently removed)
 - User receives confirmation of deletion
-

US-2.5: View Listing Details

As a user

I want to view detailed information about a listing

So that I can decide if I'm interested in the exchange

Acceptance Criteria:

- Listing page displays all product/service information
 - Seller information is visible (name, rating, profile link)
 - Desired item/service is clearly stated
 - Seller's barter history is visible
 - User can see seller's ratings and reviews
 - "Contact Seller" button is available
-

Epic 3: Barter Matching System

US-3.1: AI-Powered Smart Matching

As a user

I want to receive automatic suggestions for compatible barter matches

So that I can find suitable exchanges without manual searching

Acceptance Criteria:

- System analyzes user's offer and desired items
 - AI uses NLP to understand semantic meaning of offers
 - System suggests compatible offers from other users
 - Suggestions are ranked by relevance
 - User receives notification of new matches
 - User can view match details and accept/reject
 - Matching algorithm considers user location (optional)
-

US-3.2: Manual Search for Listings

As a user

I want to search for specific products or services

So that I can find exactly what I'm looking for

Acceptance Criteria:

- Search bar is visible on main page and navigation
 - User can search by keywords
 - Search results are displayed with relevant listings
 - Results show product image, name, and seller info
 - Search is case-insensitive
 - Search supports partial matching
 - User can sort by date, rating, or distance
-

US-3.3: Advanced Filtering

As a user

I want to filter search results by specific criteria

So that I can narrow down my options

Acceptance Criteria:

- User can filter by category (Product/Service)
 - User can filter by condition (New/Used/Like New)
 - User can filter by location
 - Multiple filters can be applied simultaneously
 - Filter results update in real-time
 - "Clear filters" button is available
-

US-3.4: View Matching Suggestions

As a user

I want to view AI-generated matching suggestions

So that I can discover compatible exchanges

Acceptance Criteria:

- User can access "Matches" or "Suggestions" section
 - Each match shows both user's offer and suggested exchange
 - User can view full details of suggested listings
 - User can accept or reject each suggestion
 - User can message the matched user directly
-

Epic 4: Communication System

US-4.1: Send Direct Message to User (Chat)

As a interested user

I want to send a message to another user about a listing

So that I can negotiate the terms of exchange

Acceptance Criteria:

- User can click "Contact" or "Message" button on listing
 - User can type message
 - Message is sent immediately
 - Recipient receives notification
 - Message is stored in conversation thread
 - Messages appear in real-time (WebSocket or polling)
 - Chat history is visible and scrollable
 - Chat history is saved for future reference
-

US-4.3: Receive Notifications

As a user

I want to receive notifications for important events

So that I stay informed about my listings and messages

Acceptance Criteria:

- User receives notification when new match is found
 - User receives notification for new messages
 - User receives notification when offer is accepted/rejected
 - User receives notification when barter is completed
 - Notifications appear in-app and via email (user preference)
 - Notification center shows all notifications
 - Notifications include relevant details and action links
-

Epic 5: Rating and Trust System

US-5.1: Rate User After Barter

As a user who completed an exchange

I want to rate the other user

So that the community can build trust and identify reliable traders

Acceptance Criteria:

- Rating form appears after barter completion
 - User can give - star rating
 - User can write optional review
 - User can rate multiple aspects (communication, item condition, timeliness)
 - Rating is submitted and saved
 - Rating appears on recipient's profile
 - User cannot rate the same person twice
 - Average rating is calculated and displayed
 - Rating count is visible
-

US-5.2: View User Ratings and Reviews

As a potential trading partner

I want to see ratings and reviews of another user

So that I can assess their reliability

Acceptance Criteria:

- User profile displays average rating prominently
 - Rating count is shown (e.g., ". stars from reviews")
 - Individual reviews are displayed with star rating and text
-

US-5.3: Dispute Resolution

As a user in a disputed transaction

I want to report an issue and request platform mediation

So that the platform can help resolve the conflict fairly

Acceptance Criteria:

- User can initiate dispute from completed barter
- User can select dispute reason (item not as described, damaged, etc.)

- User can provide detailed description and evidence (images/messages)
 - Dispute is assigned to a moderator
 - Both parties receive notification
 - Both parties can provide additional evidence
 - Moderator reviews all evidence and makes decision
 - Decision is communicated to both parties
 - User can appeal decision within days
 - Dispute resolution timeline is visible
-

Epic 6: Shipping and Delivery

US-6.1: Manage Shipping Addresses

As a user

I want to add and manage multiple shipping addresses

So that I can receive items at different locations

Acceptance Criteria:

- User can add new address with full details
 - User can set default address
 - User can edit existing addresses
 - User can delete addresses
 - Address validation is performed
 - Multiple addresses are stored and retrievable
 - Address is required before confirming barter
 - User can select address for each barter
-

US-6.2: Choose Shipping Method

As a user preparing to ship an item

I want to choose between delivery and in-person exchange

So that I can select the most convenient option

Acceptance Criteria:

- User can select "Delivery" or "In-person exchange"
- For delivery: estimated delivery time is shown
- For delivery: shipping cost is calculated (if applicable)
- For in-person: user can select meeting location

- For in-person: user can propose meeting time
 - Selection is confirmed and saved
 - Both parties must agree on method
 - Shipping method is recorded in barter details
-

US-6.4: Confirm Item Receipt

As a recipient of a shipment

I want to confirm receipt and document item condition

So that disputes about item condition can be resolved fairly

Acceptance Criteria:

- User receives notification to confirm receipt
 - User can upload unboxing photos/video
 - User can confirm item condition matches description
 - User can report damage or discrepancies
 - Documentation is stored with barter record
 - User can submit receipt confirmation
 - Sender is notified of receipt confirmation
 - Confirmation triggers rating request
-

Epic 7: Return and Refund Policy

US-7.1: Initiate Return Request

As a user unsatisfied with received item

I want to initiate a return request

So that I can exchange it for another item or resolve the issue

Acceptance Criteria:

- User can initiate return within days of receipt
 - User must provide reason for return (defect, mismatch, etc.)
 - User can upload evidence (photos, messages)
 - Return reason options are predefined
 - User can add custom explanation
 - Return request is sent to other party
 - Other party receives notification
 - Return request shows in barter details
 - Return status is tracked
-

US-7.2: Respond to Return Request

As a user receiving a return request

I want to review and respond to the request

So that I can agree or dispute the return

Acceptance Criteria:

- User receives notification of return request
 - User can view all return details and evidence
 - User can accept or reject return
 - User can provide counter-evidence if rejecting
 - User can propose alternative resolution
 - Response is sent to requesting user
 - Both parties can communicate about return
 - Return status is updated
 - If accepted, return shipping instructions are provided
-

US-7.3: Process Return Shipment

As a user returning an item

I want to ship the item back and track its return

So that I can complete the return process

Acceptance Criteria:

- User can track return shipment
 - Return is confirmed upon receipt
 - Refund/re-exchange is processed
 - User receives notification of return completion
 - Return documentation is stored
 - Return timeline is visible
-

Epic 8: Security and Authentication

US-8.1: Email Verification

As a new user

I want to verify my email address

So that I can ensure my account is secure

Acceptance Criteria:

- Verification email is sent upon registration
 - Email contains verification link
 - Link expires after hours
 - User can request new verification email
 - Email verification is required before full access
 - User receives confirmation upon successful verification
 - Unverified accounts have limited functionality
-

US-8.3: ID Verification

As a user

I want to verify my identity with ID

So that I can build trust and unlock premium features

Acceptance Criteria:

- User can upload ID photo (passport, driver's license, etc.)
 - User can upload selfie for verification
 - ID and selfie are compared for authenticity
 - Verification status is displayed on profile
 - Verified users get badge on profile
 - Verification is required for high-value exchanges
 - ID data is securely stored and encrypted
 - User can update ID if needed
 - Verification can be rejected with reason
-

Epic 9: Admin Dashboard**US-9.1: View Platform Statistics**

As a platform administrator

I want to view key platform statistics

So that I can monitor platform health and growth

Acceptance Criteria:

- Dashboard displays total active users
- Dashboard shows total completed barterers
- Dashboard displays total items listed

- Dashboard shows platform revenue
 - Statistics are updated in real-time or near real-time
 - Charts and graphs visualize trends
 - Key metrics are highlighted
-

US-9.2: Manage Users

As a platform administrator

I want to manage user accounts

So that I can maintain platform integrity

Acceptance Criteria:

- Admin can view list of all users
 - Admin can search/filter users
 - Admin can view user details and activity
 - Admin can suspend/ban users
 - Admin can restore suspended accounts
 - Admin can send messages to users
 - Admin can view user banter history
 - User receives notification of account actions
-

US-9.3: Monitor and Remove Inappropriate Content

As a platform administrator

I want to monitor listings and remove inappropriate content

So that the platform remains safe and trustworthy

Acceptance Criteria:

- Admin can preview listing details
 - Admin can remove listings with reason
 - Admin can issue warnings to users
 - Admin can ban users for repeated violations
 - Removal reasons are predefined
 - User receives notification of removal
 - Removed content is archived
 - Removal is logged
-

US-9.4: Handle Disputes and Appeals

As a platform administrator

I want to review and resolve user disputes

So that conflicts are handled fairly

Acceptance Criteria:

- Admin can view open disputes
 - Admin can view all evidence provided
 - Admin can communicate with both parties
 - Admin can make binding decision
 - Admin can request additional evidence
 - Decision is documented and logged
 - Both parties are notified of decision
 - Users can appeal within days
 - Appeal process is tracked
 - Dispute history is maintained
-

Epic 10: Search and Discovery

US-10.1: Full-Text Search

As a user

I want to search for items using keywords

So that I can find what I'm looking for quickly

Acceptance Criteria:

- Search bar is prominent on main page
 - User can enter keywords
 - Search covers product names, descriptions, and categories
 - Search is case-insensitive
 - Partial matching is supported
 - Search suggestions appear as user types
-

US-10.2: Category Browsing

As a user

I want to browse items by category

So that I can explore available options in specific areas

Acceptance Criteria:

- Main categories are displayed on homepage
 - User can click category to view listings
 - Category page shows item count
 - Items are displayed with images and basic info
 - Pagination is implemented
 - User can sort by relevance, date, or rating
 - Breadcrumb navigation is shown
 - Category descriptions are provided
-

Epic 11: User Preferences and Settings

US-11.1: Manage Account Settings

As a user

I want to manage my account settings

So that I can control my account and privacy

Acceptance Criteria:

- User can change email address
 - User can change password
 - User can update phone number
 - User can delete account (with confirmation)
 - Changes are saved immediately
-

Epic 13: Mobile Experience

US-13.1: Responsive Mobile Design

As a mobile user

I want to use Swapify on my smartphone

So that I can access the platform on the go

Acceptance Criteria:

- All pages are mobile responsive
- Touch-friendly buttons and inputs
- Navigation is optimized for mobile

- Forms are easy to fill on mobile
 - No horizontal scrolling required
 - Mobile menu is intuitive
 - Mobile testing is completed
-

Epic 14: Payment and Monetization

US-14.1: Platform Subscription

As a user

I want to upgrade to a premium subscription

So that I can access premium features

Acceptance Criteria:

- Subscription tiers are clearly defined
 - User can view subscription benefits
 - User can upgrade from account settings
 - Payment processing is secure
 - Subscription is activated immediately
 - User receives confirmation email
 - Subscription can be cancelled anytime
 - Refund policy is clearly stated
 - Subscription status is displayed
-

US-14.2: Transaction Fees

As a platform operator

I want to collect transaction fees on successful barter

So that the platform is financially sustainable

Acceptance Criteria:

- Transaction fee is calculated and displayed
 - Fee is deducted from transaction value
 - Fee is collected upon barter completion
 - Different fee tiers based on subscription level
 - Fee policy is clearly communicated
-
